Artificial intelligence is quickly evolving as a result of rapid advances in science and technology. In the 30th century, robots formed their empire and ruled themselves beyond the Earth. The war for power officially broke out. Robots control spacecraft to fight each other, opening dramatic and bloody races. But in the end, there can only be one winner!
AstroVerse has a virtual vision built on a blockchain-based game on BSC platform. Players will have opportunities to participate in appealing races and collect models of spacecraft, NFT robots and items. Players have full ownership of transferring, donating or listing these NFTs on any NFT marketplace.
 Players log into the game, connect their wallet and go to the NFT marketplace to buy spacecraft. One player must own at least 1 spacecraft.

3 levels of the arena league: Normal - Hard - Devil and the chances of winning are divided equally for players.

The game has 2 modes: using the arrow button on the keyboard or automatic PvP turn-based gameplay, the competition will be played in LvSl according to the level of the spacecraft.

When winning or losing, players will be rewarded chest shards (28-224 pieces/game) and a certain amount of experience. Players who collect enough 1000 pieces of the chest will combine into 1 chest, open the chest to receive NFTs or items to level up.

Collecting more spacecraft will increase your chances of opening a Good class.
GAME RULES

Player has 10 turns per day.

Player can Skip levels. The win condition when skipping is that the Spacecraft's Total Stats are greater than or equal to the Boss's Total Stats.

Lose ASV in each fight.
Each level of arena costs a different amount of ASV:
- Normal Arena (level 1-20): 100 ASV/challenge
- Hard Arena (level 21-40): 200 ASV/challenge
- Devil Arena (level 41-60): 400 ASV/challenge
LEVEL UP CONDITIONS

Necessary condition: Players will be leveled up when they reach enough EXP from the Enemy. Each type of spacecraft will have a different EXP by level.

Normal-class spacecraft requires 1 silver to level up.

Good class spacecraft requires 10 silver and 1 gold to level up.

High-class spacecraft requires 100 silver and 1 diamond to level up.
